

DR. G. A. GAMBLE IS SENT TO JAIL

Well Known Osteopath Fails to Promptly Pay Alimony to Divorced Wife.

FRIDAY'S DIVORCE MILL TEN CASES—QUIET HEARINGS ARE BECOMING POPULAR.

There was a falling off in the variety bill at Judge Morse's regular Friday afternoon divorce entertainment yesterday, only four divorces having been granted and a number of uninteresting cases to show case heard. There seems to be a tendency during the past few weeks to endeavor to avoid the publicity of the show cases heard. There seems to be a tendency during the past few weeks to endeavor to avoid the publicity of the show cases heard. There seems to be a tendency during the past few weeks to endeavor to avoid the publicity of the show cases heard.

The feature of the afternoon was the sending to jail for four days for failure to promptly pay alimony of Dr. Gustavus A. Gamble, a well known city osteopath. Dr. Gamble's former wife, who is also an osteopathic doctor, obtained a divorce last year. This doctor admitted and went to jail.

Divorces Granted.

"I supported myself and him, too," said Christine Lang. "I don't think he likes to work." Mrs. Lang went on to say that Walter J. Lang had not done anything for her support since their marriage except to give her \$10 the first month, which he afterwards borrowed back with \$300 more. They were married in Salt Lake City, July 10, 1907. Lang is a cook, she says, and he can earn \$25 to \$30 a month when he wants to work. He is now in California, but she said he had not written her. There are no children.

The divorce was granted after Mrs. Henrietta M. Craig, whose own divorce suit against William J. Craig was stricken from the calendar some time ago, testified in corroboration of Mrs. Lang's evidence.

Grace L. Bondurant testified that Lee L. Bondurant went to Spokane in July of last year and though she had heard that he has charge of the ticket office for some railway there, she could get no word from him. He left her without support but had sent her \$10 the first month, which he afterwards borrowed back with \$300 more. They were married in Salt Lake City, March 29, 1905, and their one child, Helen, is now 3 years old.

Mrs. Ida L. Richardson, her mother, said that Bondurant came to her house to kiss his wife and child good-bye and she have been able to get no word from him since.

The divorce was granted with the custody of the child to the mother. Mrs. Richardson may be resumed.

Clara E. Stevens Petty received a divorce from Albert C. Petty, who was married to her on June 2, 1906, but had not lived together since Dec. 10, 1905. They have one child, a little girl aged 2 years and 7 months. Alimony had been agreed at \$12.50 a month, but she said when the child was 10 years old.

Nora Rogers was married to Laban D. Rogers, Aug. 21, 1887, at Boulder, Colo., but left him because he wouldn't work and provide a living for her. Mrs. Rogers, who is a tall, willowy blonde, was outwitted by her husband, who wouldn't work and provide a living for her. Mrs. Rogers, who is a tall, willowy blonde, was outwitted by her husband, who wouldn't work and provide a living for her.

Mrs. Gamble's Complaint.

When the orders to show cause were called Mrs. Mary E. T. Gamble, whose proceedings last year against her husband, Dr. Gustavus A. Gamble, had made her thoroughly familiar with the divorce court, stepped to the stand and told the judge that the doctor had been exceeding his duty in his payment of the \$25 a month alimony ordered by the court. She produced her little memorandum book and showed the dates of payment which had each month been from a week to a fortnight after the 15th of the month, the date specified in the order.

Dr. Gamble admitted that his earnings were about \$10 a month, but said that his expenses were heavy and that he had a mother to support, all of which frequently left him short of cash.

"That will be all, Dr. Gamble," said Judge Morse. "You have systematically and willfully disobeyed the order of the court. You will be confined in the county jail for four days for your contempt of court."

Dr. Gamble had nothing to say and smiled when the court sentenced him. He was at once taken down to Sheriff Joe C. Sharp's hospital.

Martin Grimm was ordered to pay his wife, Mary G. Grimm, \$40 a month temporary alimony until the case is tried.

The order calling upon Herbert Van Dam, Jr., to show cause why he should not pay temporary alimony to his wife, Lydia M. B. Van Dam, was continued for two weeks.

E. E. Eldredge was ordered to pay his wife, Edna, \$25 a month temporary alimony until the case is tried.

For \$60 and tried to show that Eldredge owned a second-hand business and made \$200 a month, but in this she was unsuccessful.

HARMONY BILL READ AT BANQUET

Good of Utah Discussed at a Banquet Given by Samuel Newhouse.

STRONG PLEAS FOR UNITY MEMBERS OF LEGISLATURE AND OTHERS ENTERTAINED.

A "bill" for the promotion of harmony and fraternity was introduced by Samuel Newhouse at the banquet tendered by himself to the members of the state legislature, several local men of prominence and the board of governors of the Commercial club last evening in the banquet hall of that organization. The bill met with the hearty approval of all those present.

After the sumptuous banquet, Toastmaster Colborn, with a neat talk, introduced Mr. Newhouse, who made the following address:

Mr. Newhouse Speaks.

"My friends: It is usually the case when a special session of the legislature is convened that it is done through the office of the governor of the state. I am therefore putting at naught all precedents by performing that function myself. The object of calling this special session is that I have here a bill that I wish you to consider. It is true that I have gotten you here by subterfuge. Speaking of subterfuge, I am reminded that we should have the clock stopped."

"I trust every one present will give me his support and record his vote in favor of this bill. My discussion of it will be very brief, and I am sure all of you will wish to assist in its passage. It is a bill for the preservation of peace, harmony and unity in our glorious state of Utah."

"In order that the bill may be understood and specifications given in detail, and in the absence of a reading clerk, I will perform that duty myself." Then followed the reading of the bill, as follows:

The Newhouse Measure.

"Whereas, in all the world there is not a land so favored by the Almighty as Utah, her mountains inexhaustible treasure vaults, her hillsides homes of peace and beauty, her valleys her attractions, the deepest canyons, the most beautiful of lakes, mountain scenery as picturesque as that of Switzerland, pastoral scenes as soft and beautiful as those of Italy, her air distilled among the pure snows of her peaks, her climate so gentle and so invigorating that men and women are inclined to their past have exemplified their courage throughout all the toilsome days of the subjugation of the wilderness, and throughout all the later and happier days in which Utah has been growing into her present greatness:

"Be it enacted, That this bill makes it the duty of every citizen of Utah to join in brushing away forever all the animosities of the past, and to cooperate heartily and profitably into an earnest endeavor to promote fraternity among the people, to build up by conservative legislation and intelligent co-operation a commonwealth here in these mountains which shall stand an eternal contradiction to every aspersion that past circumstances have caused to be set up as a reason for doubt in the ability of those who live in this state to produce a civilization equal to any in the world."

The speaker then proposed toasts to the members of the legislature, the board of governors of the Commercial club, to his friends present and to the state of Utah.

Good Work Followed.

Governor Spry followed with an address in which he reviewed the early history of the state and its development under the business methods of Mr. Newhouse. He said:

"The speaker then proposed toasts to the members of the legislature, the board of governors of the Commercial club, to his friends present and to the state of Utah."

NOTABLE FIGURE IN UTAH MINING HISTORY DIES IN LOS ANGELES

W. W. CHISHOLM.

A telegram announced the death yesterday morning at 7:30 o'clock in Los Angeles of W. W. Chisholm, a pioneer miner and one of the most widely-known men in Salt Lake. Mr. Chisholm went to southern California last December for the benefit of his health. The telegram announcing the death was meager in its details, but it is to be presumed that Mr. Chisholm succumbed to the infirmities of advancing years.

The story of the growth and development of Utah's natural advantages, the making of the state what it has become is one that cannot be fully told without referring to the activities of W. W. Chisholm. He has been a hand in the upbuilding of the state in its most important departments. He has contributed to the development of its mineral resources, its soil fertility, its deposits of building materials, and no small part of the present richness of the state is due to him.

He was born in Wisconsin, in Grant county, June 28, 1842. Prior to the public schools and in the parochial schools he obtained his education, and it was there he spent the early years of his life. He began his own life struggle in 1858, and his first venture was an undertaking to learn the printer's trade, which he followed for ten years. He worked at the printing business in Chicago, being disappointed in not finding his father, whom he had expected to meet there.

He continued on the same year to Utah, traveling by teams across the desert, and arrived in Salt Lake City in the fall of 1858. Here he at once began his mining life and he and his father located a number of different claims which they disposed of later very advantageously. In the fall of 1865 he returned to Illinois and resumed the printing trade.

Arrival in Utah.

It was in 1869 that the mining interests had formed with his father brought him again to Utah. The father moved to California in 1863, spending the remaining years of his life in that state. He died there in 1870. The mother died in Elgin, Ill., in 1878. Besides the mining property in Utah, father and son had interests in mines in Nevada, and Mr. Chisholm helped to found and was a director in the Bank of Commerce, in this city. He was also a member of the Utah Mining and Smelting Co., and the Utah Smelting and Refining Co. of Illinois.

His Mining Interests.

In the early '80s Mr. Chisholm, associated with James F. Woodman, J. D. Kendall, J. E. Bamberger, Simon Bamberger, Judges C. W. Bennett and Moses Kirkpatrick, opened and developed the Centennial Eureka mine in the Tintic district. This mine, one of the most famous in the history of Utah, paid dividends amounting to \$2,000,000 up to 1899, when it was sold to Cole, Clark & Coolidge of Boston for \$2,000,000. The property was later turned over to the Centennial-Eureka Mining company of Idaho, which is owned by the United States Smelting, Refining & Mining company.

Mr. Chisholm also participated in the opening of the old Emma mine of Alta, and from which about \$5,000,000 was taken. The Emma mine was one of the most famous in the history of the state, and it was named for Miss Emma Chisholm, sister to William W. Chisholm. He was married to Miss Emma Chisholm in 1861, and they had three children, two sons and one daughter. The Emma mine was one of the most famous in the history of the state, and it was named for Miss Emma Chisholm, sister to William W. Chisholm. Storm is Over.

Observer Church has sent out word that the storm is over and that fair weather may be expected to prevail in this locality today. The temperature has not reached the point desired by many, but is nevertheless up to normal. The maximum temperature recorded Friday was 63 degrees above and the minimum 35 degrees below.

Thursday night the storm took its leave of this locality and "hit the high places" for more eastern points. Not a cloud was seen in the sky yesterday and spring weather prevailed again. It is predicted that the last snowstorm of the season has come and gone. The meteorological report for Friday is as follows: Temperature at 6 p. m., 48; maximum temperature, 63; minimum temperature, 35; mean temperature, 48. Total precipitation since Jan. 1, 3.81 inches. Total precipitation since Jan. 1, 3.81 inches. Total precipitation since Jan. 1, 3.81 inches.

RAILROADS PREPARING FOR ELKS' MIGRATION

Twenty-five Thousand Expected to Pass Through Salt Lake

Over 25,000 Elks and their friends will pass through Salt Lake City early in July to attend the Elks' conference in Los Angeles July 11 to 17, according to information received by railway agents here who have been making careful inquiries concerning the matter. From Idaho and from Montana special trains will be run to Los Angeles, which will pass through this city and go on to Los Angeles over the Salt Lake Route. Special trains will also be run from Denver, also probably from Chicago. In fact, it is stated that in all there will be as many as twenty special trains from various points, mostly in the east, taking people to the big convention. And more than two-thirds of the travelers will pass through this city. The passenger departments of all the roads that will handle this traffic are now getting out pamphlets devoted to the big convention, showing points of interest in this city and Los Angeles and giving all kinds of information for those who will attend the convention. The Atchison, Topeka & Santa Fe railroad expects to issue its pamphlet within a few days and the Salt Lake Route is already distributing its little booklet, which is very neat. The book has a very pretty cover design—elk in its native haunts—and printed on the cover are the words "Through Salt Lake, the Quaint Mormon Capital." The booklet is well illustrated and the descriptive matter concerning the city of Salt Lake and the scenes along the Salt Lake Route is very interesting.

A railway representative of Salt Lake City, himself an Elk, who recently was in Butte on business, reports that Montana Elks are making great plans for the trip to Los Angeles. "The Butte lodge has decided to employ the famous Butte-Boston train to accompany them on the trip. A special car on the special train will be given over to the use of the band. Taking the band to Los Angeles and back will cost the Butte lodge, it is said, \$4,000."

Long Cut-off for Hill's New Line to the Coast

Spokane, Wash., March 18.—A long cut-off running from near Washburn, Wash., to Salt Lake City, to join the Northern Pacific tracks near Missoula, Mont., is stated to be planned by engineers of the Portland & Spokane railway. Hill's new line to the coast through the Northern Pacific branch line from Wallace to Missoula may be altered and made a part of the new road.

News of Railroads in Condensed Form

F. P. Cullen, superintendent of the Los Angeles division of the Salt Lake Route, is in the city on railroad business.

J. B. Whitcomb, traveling representative of the Nickel Plate road, was a visitor in this city for several hours yesterday. He was on his way to the Pacific coast.

Orson Longfield, contracting freight agent in St. Louis, Mo., for the Big Four system, who has been in Portland and in Salt Lake City on business, is now on his way to the Pacific coast.

Kenneth C. Kerr, district passenger agent for the Salt Lake Route, received a telegram yesterday announcing the arrival of his brother, H. S. Kerr, in company with his wife, in New York. They will start immediately for Salt Lake to visit old friends and relatives. H. S. Kerr has been located in Peru for the last five years, where he has been engaged in his vocation, railroad work. He is now absent on a four months' leave of absence.

General Manager W. H. Bancroft of the Oregon Short Line, accompanied by several other officials of the road, is expected to make a general trip of inspection over the road in his private car.

Commercial Agent Charles Warren has returned home from a business getting trip to southern Utah.

It was announced in one of the local railroad offices yesterday that a letter had been received to the effect that W. S. Kuhn of Pittsburgh, president of the Idaho Southern railway, which runs through the famous Twin Falls irrigated tract from Gooding to Jerome, in Idaho, would make a western trip soon and would arrive in Salt Lake City about April 15. Mr. Kuhn is at the head of the Pittsburgh company which irrigated thousands of acres in southern Idaho. It is expected that with his arrival there will be some announcements made regarding extending the Idaho Southern.

Local merchants have received notification from the commercial agent of the Atchison, Topeka & Santa Fe railroad of the adoption of a new freight tariff on eggs which will go into effect on that road and on several other lines operating from the same territory on April 15. The rate was recently announced by the Southwestern Tariff association and will be \$1.50 per 100 pounds on eggs in car load lots, with a minimum weight of 20,000 pounds from Texas points to Utah common points. The new rate will be \$2.00 per 100 pounds in car load lots, with minimum weight of 24,000 pounds. Commercial Agent Warren of the Atchison, Topeka & Santa Fe said yesterday that the rate had been agreed upon because of the great scarcity of eggs here this season, which has made unusually large shipments from Texas necessary.

Horace Sommers, representative of the Dakota Western railroad, who has been in California for two months with his wife, was a visitor in Salt Lake yesterday. He states that the Dakota Western is yet to be built. The company was incorporated in South Dakota with \$200,000 capital and with headquarters at Whitewood. It is proposed to build the line from that city to Attainment, in

State Resists New Trial for Vance on Murder Charge.

Arguments in the hearing for a new trial for Thomas Vance, convicted of wife murder, opened before Judge Armstrong of the district court yesterday afternoon. After the presentation of a number of affidavits from neighbors of Mrs. Vance, adjournment was made until 10 o'clock this morning
